Dominoes

Create a single page application to show domino cards like the following example :

Write the code in the CodeSandbox based on the template provided :

https://codesandbox.io/s/dominoes-student-template-92gg8y

Features

Show all domino cards

The application will display all domino cards based on the data provided.

Show how many double numbers appear

The application will display how many double numbers appear.

Example :

[1, 2] **[1, 1]** [4, 1] **[3, 3]** [6, 1] → 2

[5, 1] [3, 2] [2, 3] [3, 1] [5, 1] → 0

Sort data (asc & desc)

Users can sort the domino cards in ascending or descending order.

Sorting rules :

- Sorting domino cards based on the total number on each card
- Prioritize domino cards with smaller numbers (asc) or larger numbers (desc)
  Example :
  Source : **[3, 4]** [1, 2] **[1, 6]**
  Asc Order : [1, 2] **[1, 6] [3, 4]**
  Desc Order : **[3, 4] [1, 6]** [1, 2]

Remove duplicate

Users can remove domino cards with the same total number and number combination.
Example : [1,2][1,2][2,1][1,3] → [1,3]

Flip the cards

Example : [1,2][1,2][2,1][1,3] → [2,1][2,1][1,2][3,1]

Remove cards with certain total number

Example : [1,2][2,2][2,1][1,3] → remove 4 → [1,2][2,1]

Reset data

Users can reset the data to default data.
